DXN GANODERMA

MEET THE KING OF HERBS

APPROVED AS AN ANTI-CANCER HERB IN JAPAN

CALLED THE SPIRITUAL HERB OF IMMORTALITY

5000 YEARS OLD WRITTEN RECORD

NO SIDE EFFECTS WERE NOTED IN 5000 YEARS

WORKS ON CELL LEVELS (GREATEST INTRACELLULAR PENETRATION CAPACITY IN THE WORLD)

CAN REPAIR ANY DAMAGE TO THE BODY (SMALL AND SERIOUS)

RATED AS A-1 SUPERIOR HERB ON TCM

IT CONTAINS 400 BIO-ACTIVE NATURAL ELEMENTS, WHICH BENEFITS THE BODY IN THOUSAND WAYS EVERYDAY

OUR IMMUNE SYSTEM IS FIGHTING AGAINST GARBAGE WITHIN THE BODY

WHEN IMMUNE SYSTEM FAILS DISEASES DEVELOP

IT IS A COMPLETE BODY MECHANIC

IF WE DON'T HAVE ANY DISEASE STILL 300 CANCER CELLS DEVELOP IN OUR BODY EVERYDAY

IF OUR BODY (IMMUNE SYSTEM) CANNOT FIGHT THIS CANCER DEVELOPS

TO STAY HEALTHY IT WOULD BE IDEAL TO INDUCE IMMUNITY POWER WITHIN ONESELF - DR. FUKUMI, JAPAN

DR. FUKUMI is a GANODERMA researcher at the Linus Pauling Institute of Science & Medicine – an American institute that had been awarded the most Nobel prizes.

GANODERMA IS THE GREATEST HERB ON EARTH WHICH CAN ENHANCE IMMUNITY TO OPTIMUM LEVELS

Complete everyday maintenance for your body

One should take it to avoid huge $$$ in diseases

Red Mushroom (or Reishi (Japan), Lingzhi (China), Ganoderma Lucidum)
DXN Ganoderma is a combination of top 6 varieties of Ganoderma species

**Red mushroom, the ancient Chinese secret of health and longevity**

Ganoderma, more than 5000 years old, has various names.

In China, it is known as Lingzhi, Japan – Reishi, Arab – Al Kam’ah, Indonesia – Jamur.

Has more than 200 natural active elements, divided into three categories 30% water soluble elements, 65% organic soluble elements, 5% volatile elements.

**Always hoped for vibrant health under your control?**

Humble red mushroom might be the answer for this. Good health is the direct result of optimal natural healing abilities (**strong immune system**) of the body and red mushrooms are regarded the king in this area.

Ganoderma is able to improve the body’s healing ability, maintain a healthy body and promote longevity. Suitable as health food as confirmed by many clinical trials and ongoing research in the world.

**Red mushrooms for health**

With approximately 400 bioactive compounds red mushrooms fulfill all the needs of the body to boost up natural healing abilities. It is regarded as the healthiest herb known to mankind.

**What is Red mushroom (Ganoderma Lucidum)**

Gano means shine, Derma means skin – it has shining skin which is of red color. It belongs to the species of mushroom. There are 38,000 varieties of mushroom found on earth. 36,000 are poisonous, 2,000 are edible (we can eat – what we purchase from the local market is one of them), 200 are having special medicinal properties. And out of these 200 – top 6 have greatest medicinal properties – far superior than any other in this group. There color is shining Red. These top 6 varieties are called Red Mushrooms or Ganoderma Lucidum. Ganoderma is regarded as the **KING OF ALL HERBS all around the world.**
MIRACULOUS HEALTH BENEFITS OF CONSUMING DXN GANODERMA

<table>

Improves body’s oxygen absorption.

Improves respiratory system.

Strengthens cell membranes.

Strengthens body’s natural healing ability.

Strengthens natural immune system.

Strengthens physical health & stamina.

Lowers cholesterol level.

Lowers free-fat level.

Lowers sugar level.

Lowers blood lipid level.

Prevents growth of abnormal cells.

Prevents allergy caused by antigens.

Prevents clotting of blood.

Stops uncontrollable bleeding.

Heals internal & external wounds.

Overcomes skin diseases.

Beautifies skin.

Induces mental calmness.

Slows the ageing.

**DXN Ganoderma makes cells healthy as below**

![Diagram of healthy and unhealthy cells](image)
In this picture these cells are going to be diseased soon

When cells are healthy body is healthy, when cells are weak body is weak.

When cells are diseased body is diseased, when cells are dead body is dead.

See how our body is made:
In other words:
If Cells are healthy = Tissues are healthy = Organs are healthy = systems are healthy = body is healthy
If Cells are weak = Tissues are weak = Organs are weak = systems are weak = body is weak
If Cells are diseased = Tissues are diseased = Organs are diseased = systems are diseased = body is diseased
If Cells are dead = Tissues are dead = Organs are dead = systems are dead = body is dead

If we see the same in reverse order:
If body is healthy = systems are healthy = Organs are healthy = Tissues are healthy = Cells are healthy
If body is weak = systems are weak = Organs are weak = Tissues are weak = Cells are weak
If body is diseased = systems are diseased = Organs are diseased = Tissues are diseased = Cells are diseased
If body is dead = systems are dead = Organs are dead = Tissues are dead = Cells are dead

**IMPORTANT**

The above mentioned products are herbal food supplements and few cosmetic designed to assist in the maintenance of general wellbeing through regular use. These products are not intended to diagnose, treat, cure or prevent any disease. We are not doctors. We do not condone or advocate self-diagnosis or self-medication in any way. If you have a condition which requires medical diagnosis and treatment, it is important that you visit your doctor to see his/her advice.
What experts say about Ganoderma Lucidum

Dr. N K Venugopal, a medical practitioner at Muvattupuzha in Kerala’s Ernakulam district, says he has been prescribing products made out of ganoderma for over six years and claimed to have found total cure in about 1,000 patients suffering from various ailments.

“It is not disease-specific or organ-specific. It is a dietary supplement, which corrects the disorders of the body mainly by enhancing immunity and rebuilding lost or damaged cells,” says Dr. S Ranjan, a leading cardiologist in Chennai.

“The regular intake of ganoderma along with medication has proven that cancer can be cured in early stages,” he says, adding that the polysaccharide fractions in ganoderma are mainly responsible in developing immunity against tumors.

Prof. K K Janardhanan of the Department of Microbiology, Amala Cancer Research Institute, Thrissur, says he was impressed by anti-cancer properties of ganoderma during various studies.

“Our research has shown that methanolic extract of ganoderma lucidium, the variety commonly found in South India, possesses significant anti-tumor and anti-oxidant activities,” he says.

“When mice were administered a dose of 500mg of ganoderma per kg of body weight after implanting a tumor, it was found that the tumor load was reduced by 97.7 per cent within 10 days,” he says.
Dr. Venugopal says he has noticed that even in patients in their final stages of cancer, ganoderma increases life-expectancy, reduces pain substantially, improved quality of life and reduces the side-effects of chemotherapy and radiation.

Dr. Ranjan also says it was the anti-cancer effect of ganoderma on a person with myelomonocytic leukemia that exposed him to the virtues of the mushroom.

“A friend of mine was having blood cancer in its final stages in 1999 when he started having ganoderma products. Within days, he showed signs of remission. He had a more comfortable living for four more years,” he says.

The effect of mushroom was found to be cent percent in diabetics, psoriasis, liver and cardiovascular disorders, says Dr. Venugopal.

Prof. M T Joseph of Thodupuzha in Kerala’s Idukki district says he was suffering from acute psoriasis eight years back. “Different systems of treatment, including allopathy, ayurveda and homeopathy, could not bring any relief. Then, I came across ganoderma through a friend who was cured of acute diabetics. After consulting a few experts, I started having ganoderma and, to my surprise, within a few months I fully recovered,” he says.

“Another remarkable thing I found was that many other smaller problems like ulcer in the stomach and bleeding of the gum also were cured,” he says, claiming that apart from building up immunity of the body, the mushroom also has anti-ageing properties.

Various products of ganoderma are being consumed by people in around 60 countries, says Dr. Venugopal, adding that these have been certified by United States Food and Drug Authority (FDA) and approved by Japan in anti-cancer care.

While Indonesia has an approved diploma course in ganotherapy, various species of ganoderma have been included in Chinese pharmacopeia.

In China, mushrooms were in use for over 4,000 years for physical and mental wellbeing. Known as ‘Ling zhi’ in local parlance, it was an expensive tonic mostly reserved for emperors and the rich.

The medicinal properties of various varieties of red mushroom, especially those found in India, have special reference in the ancient ayurvedic texts, adds Dr. Venugopal.

As much as 6,000 tons of ganoderma extracts are produced yearly across the globe, with China, Japan and the two Koreas being the main producers. The total trade touches $ 4 billion, he says.
Your Immune System is The Best Doctor

A Strong Immune System means Having a Healthy Body.

Nature has gifted man with a natural doctor right from his birth.

The name of this doctor in our body is “immune system”. This doctor is born with us and dies with us.

If your immune system is strong, the body is able to effectively fight diseases caused by bacteria, virus or simply body imbalances (e.g. elemental or nutritional deficiencies).

However, when your immune system goes weak, the “foreign invaders” or toxins (poison) penetrate into the cells of the body and cause diseases.

If lung cells are affected, it creates asthma or other respiratory diseases.

If heart cells are affected, it gives rise to blood pressure, heart related problems, etc.

If kidney cells are affected, the kidney organs lose the ability to excrete waste products leading to kidney failure, then dialysis will be required and eventually kidney transplantation.

If joints and bones are affected, it leads to arthritis leading to impaired mobility.

If brain cells are affected, it affects sensory and locomotor functions of the body. It may also lead to migraine, meningitis, paralysis, blurry vision, etc.

Worst of all, if those affected cells become extremely abnormal in structure (anatomy) and function (physiology) that would spread affecting the good cells, we call them cancer cells.

Thus, when the doctor in us loses his power of resistance, we become weak and contract diseases in various organs of the body.

The Immune System is our best defense against disease. It is a network of cells, tissues and organs that work together to protect the body against attacks by “foreign” invaders or toxins. It destroys infected and malignant cells, and removes cellular debris. The system includes:
1. **Protective Barriers**: Mucous membranes and Skin

2. **Creation of Antibodies**: Tonsils, Thymus, Lymph Nodes and Tissues, Spleen and Bone Marrow

3. **Soldiers Cells**: T lymphocytes and B lymphocytes

**Exposure to Toxins:**

1. Dust
2. Pollens
3. Smoke (1st & 2nd hand smoking) or polluted air
4. Microorganisms (virus, bacteria, fungi & protozoa)
5. Cumulative “mild” chemicals (preservatives, chlorine, fluoride, pesticides, etc.)

Many of these toxins get into our body as we breathe, eat, drink, and are exposed to the environment. Due to these daily exposures in varying degrees, our body cells become “out of balance.” Then, health problems or diseases develop to the point that they become chronic or lifetime. To avoid this, we should always keep our Immune-System strong.

Exposure to toxins cannot be avoided as we cannot stop breathing, drinking or eating. So, we need a **PERMANENT PROTECTOR** against toxins!

**Why do people get sick?**

- Body exposure to toxins
- Immune System reacts to toxins
- Immune System uses up its existing cell population (immune system cells or soldier cells)
- Immune System uses up existing supply of raw materials (proteins, carbohydrates, lipids, nucleotides, vitamins, etc.)
- **No more Immune System cells or soldiers are produced or rate of production is slower than needed**
- Stressed out Immune System
- Body of person gets SICK!

Ganoderma has the cells repair and regeneration power, this way ganoderma can rebuild damaged organs of the body & help our body to stay healthy. It can help recover (who uses it positively) even from serious diseases be it any (no approved therapeutic claims by the company). Main purpose (targeted purpose) of taking Ganoderma is that one should be in vibrant health and should not develop any health problems in future. Ganoderma does not cure the body, ganoderma only provides to the body what body needs, when all the requirements of the body are fulfilled, body can repair itself on its own, in fact “our body is the best doctor in the world.” When anyone takes it he/she starts their journey towards optimum health, this way no diseases should ever touch your body. (It goes beyond our health, it goes towards spirituality — that’s why this herb is called “the herb of immortality” and worshipped all around the world.)

“Let food be your medicine” - Hippocrates
